Punch Down Tool

A punch down tool is one of the most important tools for a data and voiced installer. The D-Link Punch Down Tool is comfortable and its special design reduces the chance of slippage. It is engineered to reduce the amount of impact felt in the palm of the hand to reduce fatigue. This is important for large installations.

FEATURES

- Color-coded yellow handle on the cut side of the tool reduces the chance for termination errors.
- Adjustable low and high impact force settings allow the tool to be set according to the user's preference
- Reversible blades for seating/cut or seating only for jumper wires.
- Spare blade storage in the handle reduces installation time when a replacement blade is required
- Blades are made from heat-treated, high-carbon tool steel with a black-oxide, rust-resistant finish and a precision-ground cutting surface for long life
- Simplified internal impact mechanism eliminates jamming for longer, trouble-free service

SPECIFICATIONS

- 7.3 inch steel construction body
- Weight: 130 gms
